Fondarex SA

Bilbao, Spain | 25 November 2026

The final stop of our Global Training Tour 2026, and what a place to end it.

From Chicago to Bilbao: in 8 months, across 11 cities in 9 countries, we shared how FX TECHNOLOGY helps produce higher-quality, more reliable, and more cost-efficient components.

What stays with us is the curiosity, the conversations, and the people who move die casting forward every day.

¡Muchas gracias! Thank you to our partner CONIEX and to everyone who joined the journey.
