

Fondarex SA

Amazing FX TECHNOLOGY Training Day in Chennai!

A sincere thank you to all participants for your time, insightful questions, and strong engagement. Your curiosity is what makes these events truly impactful.

As part of Fondarex's 80th anniversary global training tour, we hosted our second event in India, bringing together die casting experts for an intensive day of knowledge sharing. The focus was on transforming vacuum, jet cooling, and squeeze technologies into practical process improvements to enable more stable production and higher casting quality.

Our journey continues with upcoming training stops:

May 14 – Korea / Ulsan

May 18–19 – Italy / Bergamo

June 11–12 – Sweden / Värnamo
