Buy the original buy **Fondarex SA**.

Fondarex SA invented the vacuum system in the 80s.

I was lucky to be one of the first users of its advantage when I was supervisor at Teksid Aluminum Plant in Carmagnola- Italy.

We got the first order from Toyota in 1988, for 1000 aluminum cover head /day, with very demanding acceptance standard to be respected.

My engineering dpt decided to have **Fondarex SA** vacuum system, just in case of any problem of porosity.

Results were outstanding and overcame my best expectations. In fact, we made records of quality, not only for zero porosity but also for eliminating cold shuts and oxide inclusions, surprising Toyota at that time.

Now **Fondarex SA** leads the market, with more than 3.000 customers spread all over the world, and collect data, data, data and data by remote-monitoring production performance of its customers.

Many other companies have tried to copy **Fondarex SA**, but no one can match its results in terms of reliability, safety and easy maintenance.

Imagine being part of the 3.000 customers and enjoy the Artificial Intelligence (AI) real time optimization and consequent cost savings!!

Buy the original buy **Fondarex** and enjoy the competitive advantage of it.
