

Fondarex SA

Two Days. One Topic. Maximum Expertise.

At Fondarex, continuous learning drives innovation.

Over the past two days, our team completed an intensive HYDRAULIC training led by our expert Stefan Jenal, covering a wide range of topics, including hydraulic fundamentals and safety, valve and accumulator technologies, FX SQUEEZE systems, hydraulic vacuum valves, and hydraulic power units.

A valuable opportunity to deepen our technical expertise and further strengthen our support for the global die casting industry.

Thank you, Stefan, for sharing your knowledge and passion, and to the Fondarex team for their engagement, curiosity, and enthusiasm throughout the training.
